

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Weekly COVID-19 Public Health Report

The Weekly COVID-19 Public Health Report includes enhanced, more granular information to be updated on a weekly, or biweekly basis, including town-by-town case and testing information, cases and deaths in Long Term Care Facilities, updates on nursing facility audit results, and more.

Massachusetts Department of Public Health COVID-19 Dashboard

Table of Contents

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town.....	3
Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by County.....	25
Map of Average Daily Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks.....	26
Map of Percent Positivity (PCR only) among Tests Performed for COVID-19 in MA by City/Town Over Last Two Weeks	27
Map of Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region.....	28
MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed	29
MA Contact Tracing: Case and Contact Outreach Outcomes.....	30
Massachusetts Residents Quarantined due to COVID-19	31
Massachusetts Residents Isolated due to COVID-19.....	32
COVID Cluster by Exposure Setting Type.....	33
Daily and Cumulative COVID-19 Cases Associated with Higher Education Testing	36
Daily and Cumulative Total COVID-19 Molecular Tests Associated with Higher Education Testing.....	37
Percent Positive of Molecular Tests in MA Associated with Higher Education Testing and Percent of Confirmed Cases by Date Associated with Higher Education Testing.....	38
Cases and Case Rate by Age Group for Last Two Weeks.....	39
Cases and Case Rate by Sex for Last Two Weeks.....	40
Hospitalizations & Hospitalization Rate by Age Group for Last Two Weeks.....	41
New Daily Confirmed COVID-19 Hospital Admissions	42
Deaths and Death Rate by Age Group for Last Two Weeks	43
Deaths and Death Rate by County for Last Two Weeks	44
Deaths by Sex, Previous Hospitalization, & Underlying Conditions	45
Cases, Hospitalizations, & Deaths by Race/Ethnicity	46
COVID Cases and Facility-Reported Deaths in Long Term Care Facilities.....	47
Long-Term Care Staff Surveillance Testing	55
CMS Infection Control Surveys Conducted at Nursing Homes	77
COVID Cases in Assisted Living Residences.....	88
PPE Distribution by Recipient Type and Geography.....	93

Massachusetts Department of Public Health COVID-19 Dashboard – Friday, November 27, 2020

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town, January 1, 2020 –

November 25, 2020

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days) ¹	Relative Change in Case Counts ²	Total Tests	Total Tests (Last 14 days)	Total Positive Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity ³
Abington	439	60	23.5	Lower	11363	1386	64	4.62%	Lower
Acton	305	53	16.0	Higher	17234	2243	56	2.50%	Higher

Attleboro	1438	284	43.6	Higher	30359	4423	309	6.99%	Higher

Data are current as of 1 pm on 11/25/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 24. ²Number of new cases occurring over the current two-week period (11/08/2020 – 11/21/2020) compared to the previous two-week period (11/1/2020 – 11/14/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (11/19/2020) report. **No Change**=<0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Hamilton	78	13	12.6	Higher	5175	794	15	1.89%	No Change

Data are current as of 1 pm on 11/25/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 24. ²Number of new cases occurring over the current two-week period (11/08/2020 – 11/21/2020) compared to the previous two-week period (11/1/2020 – 11/14/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (11/19/2020) report. **No Change**=<0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Data are current as of 1 pm on 11/25/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 24. ²Number of new cases occurring over the current two-week period (11/08/2020 – 11/21/2020) compared to the previous two-week period (11/1/2020 – 11/14/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (11/19/2020) report. **No Change**=<0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Massachusetts Department of Public Health COVID-19 Dashboard – Friday, November 27, 2020

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks 11/08/2020 - 11/21/2020

* Data as of 25NOV2020
and are subject to change.

Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region

7 Day Total of New Cases Through November 16, 2020

EMS Region	New Cases Per 100,000
1	247
2	239
3	355
4	190
5	224

Notes

- (1) Massachusetts is divided into five geographical EMS regions. For more information, please see <https://www.mass.gov/service-details/ems-regions-in-massachusetts>.
- (2) Cases per 100,000 for each EMS region are calculated as the number of new cases within a region divided by that region's population multiplied by 100,000.
- (3) Data source: MAVEN and Umass Donahue Institute Population Estimates.
- (4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Massachusetts Residents Isolated due to COVID-19

Status of all Confirmed COVID-19 Cases as of November 25, 2020

NOTE: Individuals who had a confirmed case of COVID-19 and are no longer in isolation are considered for purposes of this report to be recovered. As part of this definition, DPH is counting people as released from isolation after 21 days of illness or 21 days past the date of their test in all settings including nursing homes and state facilities.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

COVID-19 Cluster Categories

Exposure Setting ▲	Includes
24/7 Congregate Settings	Group homes, congregate housing, disabled community housing, halfway houses, sober homes, residential treatment centers, lodging and rooming houses
Child Care	
Colleges and Universities	
Corrections	Jails, prisons, houses of corrections, correctional treatment centers
Hospitals	All hospitals, including inpatient psychiatric, inpatient addiction treatment, chronic disease and rehabilitation
Household	Shared residence – not associated with another cluster
Industrial Settings	Industrial settings including construction and non-food manufacturers, warehouses and distribution centers
K-12 Schools	Boarding schools, public schools, private schools, special education schools
Long Term Care Facilities	
Organized Athletics and Camps	Sports teams, tournaments, and clubs; children's camps
Other	
Other Food Establishments	Food distributors, manufacturers, warehouses, processors, farms, and food pantries
Other Healthcare	Ambulatory mental health services, community health centers, home health, dental, ambulatory care settings, hospice, addiction treatment (non-residential or outpatient), emergency medical services
Other Workplaces	Offices, work-related events, first responders
Places of Worship	
Recreation/Cultural	Gyms, fitness centers, swimming pools, beaches, movie theaters, golfing, boating, casinos
Restaurants and Food Courts	
Retail and Services	Grocery stores, hair salons, barbers, other retail stores
Senior Living	Assisted living facilities, retirement communities, senior housing, rest homes
Shelters	
Social Gatherings	Parties, group gatherings, weddings, funerals, private clubs, yacht clubs
Travel and Lodging	Domestic or international travel, hotels, cruise ships

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Active COVID-19 Cluster Explanation

Clusters Within Long-Term Care Facilities

- A confirmed case is defined as a staff or resident with a new positive COVID-19 test result.
- Confirmed cases are reported by each facility in aggregate, at least once a week, and are assigned to the week in which the data are submitted.
- A “new” cluster is defined as two or more confirmed cases in a facility that has not reported a confirmed case in the prior 4 weeks.
- A cluster is deemed closed when a facility has gone two incubation periods (28 days) without reporting a confirmed case among staff or residents.

Household Clusters

- A household “cluster” is defined as two or more confirmed Massachusetts cases, who reside at the same address with COVID-19 infection within 28 days of each other, and who are not associated with another cluster.
- The date assigned to each confirmed case’s event is that of the first positive lab date.
- A cluster is deemed closed once two incubation periods (28 days) have passed from the last confirmed case.

All Other Clusters

- All other “clusters” are defined as two or more confirmed Massachusetts cases with a common exposure.
- The date assigned to each confirmed case’s event is that of the first positive lab date.
- The date assigned to each contact is that of the date they were linked to the cluster.
- A cluster is deemed closed once two incubation periods (28 days) have passed from the last confirmed case.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Active COVID Clusters by Exposure Setting Type

Exposure	New Clusters (Identified 10/25 – 11/21)			Ongoing Clusters (Cluster Identified Prior to 10/25 But Not Meeting Criteria for Closing)			Total

Total	8,321	22,328	1,094	3,266	3,308	779	11,587	25,636	1,873	

New Clusters: Clusters with the first case (indicated by the first positive lab result) identified during the four week period 10/25/2020 – 11/21/2020

Ongoing Clusters: Clusters with the first case identified prior to 9/27 that has not met criteria to be closed. Confirmed cases included in ongoing clusters occurred between 10/25 and 11/21 but are associated with a cluster that began prior to 10/25. Close contacts included in ongoing clusters occurred between 10/25 and 11/21 but are associated with a cluster that began prior to 10/25.

Closed Clusters: A cluster is closed after 28 days have passed since the last confirmed case; 17,485 clusters are closed, 84,469 cases are associated with closed clusters

Source of data: Massachusetts Department of Public Health, Bureau of Infectious Disease and Laboratory Sciences. Long Term Care Facility Data from the National Healthcare Safety Network beginning 5/31/2020. All other data from MAVEN and are subject to change.

Only clusters consisting of two or more confirmed Massachusetts cases with a common exposure have been included.

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health. Note: all data are current as of 1:00pm on 11/25. Please refer to previous page for the daily counts of the new molecular tests associated with higher education settings by date of test. Other colleges and universities may also be coordinating or conducting laboratory testing for their students, faculty and staff but not identifying that in the laboratory reports they send to DPH.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Cases and Case Rate by Age Group for Last Two Weeks

This data covers 11/08/2020 to 11/21/2020

Total COVID-19 Cases by Age Group for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Cases by Age Group for Last Two Weeks

Average age of Total COVID-19 Cases for Last Two Weeks
39

Cases and Case Rate by Sex for Last Two Weeks

This data covers 11/08/2020 to 11/21/2020

Total COVID-19 Cases by Sex for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Cases by Sex for Last Two Weeks

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Hospitalizations & Hospitalization Rate by Age

Group for Last Two Weeks

This data covers 11/08/2020 to 11/21/2020

Total COVID-19 Cases Occurring in the Last Two Weeks who were Reported as Hospitalized* by Age Group

Rate (per 100,000) of Total COVID-19 Cases Occurring in the Last Two Weeks who were Reported as Hospitalized* by Age Group

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Population Estimates 2011-2019: Small Area Population Estimates 2011-2020, version 2019; Tables and Figures created by the Office of Population Health. Notes: all data are current as of 1:00pm on 11/25; *Hospitalization refers to status at any point in time, not necessarily the current status of the patient, demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

New Daily Confirmed COVID-19 Hospital Admissions

Data current as of 3:00pm on 11/24/2020

Data Sources: COVID-19 Data provided by the MDPH survey of hospitals (hospital survey data are self-reported); Tables and Figures created by the Office of Population Health.

Notes: for purposes of this reporting, "confirmed" are cases with a PCR test.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Deaths and Death Rate by Age Group for Last Two Weeks

This data covers 11/08/2020 to 11/21/2020

Deaths by Age Group in Total COVID-19 for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Deaths by Age Group for Last Two Weeks

Average Age of Deaths in Total COVID-19 Cases for Last Two Weeks

81

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Deaths and Death Rate by County for Last Two Weeks

This data covers 11/08/2020 to 11/21/2020

Count of Deaths in Total COVID-19 Cases by County

Rate (per 100,000) of Total COVID-19 Deaths by County

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; County Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018, Massachusetts Department of Public Health, Bureau of Environmental Health; Tables and Figures created by the Office of Population Health. Note: all data are current as of 1:00pm on 11/25. Includes both probable and confirmed cases.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Deaths by Sex, Previous Hospitalization, & Underlying Conditions

Data current as of 1:00pm on 11/25/2020

Total Deaths by Sex+

Total Deaths with a Previous Hospitalization*

Total Deaths** with Underlying Conditions

● Female ● Male

● Yes ● Unknown ● No

● Yes ● No

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital survey; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 1:00pm on 11/25. *Hospitalized at any point in time, not necessarily the current status; **Only includes data from deaths following completed investigation, figures are updates as additional investigations are completed; + Excludes unknown values. Includes both probable and confirmed cases.

Massachusetts Department of Public Health COVID-19 Dashboard - Friday, November 27, 2020

Cases, Hospitalizations, & Deaths by Race/Ethnicity

Data current as of 1:00pm on 11/25/2020

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, DPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

Note: COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Department of Public Health is working with these organizations to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19 patients.

Total Cases, n=214,594

Total Cases Reported as Hospitalized*, n= 14,139

Total Deaths, n=10,604

● Asian Non-Hispanic ● Black/African American Non-Hispanic ● Hispanic ● Other Non-Hispanic ● Unknown/Missing ● White Non-Hispanic

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Tables and Figures created by the Office of Population Health. Note: all data are current as of 1:00pm on 11/25. *Hospitalization refers to status at any point in time, not necessarily the current status of the patient/demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy.

Long-Term Care Staff Surveillance Testing

- On June 30, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings. This [testing policy](#) has been updated to align with federal policy and as more is learned about COVID-19
- Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- Nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19
- Facilities are required to adhere to a surveillance testing regimen based on the results of the baseline testing and adapt such regimen based on the presence of new cases and regional positivity rates; specifically:
 - If there are new COVID+ cases, the facility must test all staff weekly until there are no new cases for two weeks**
 - If there are no new COVID+ cases, the facility must either test all staff, or 50% of staff, bi-weekly, depending on the 14-day positivity rates in the facility's county (included in this report)**
- This report includes information on what staff surveillance testing regimen each facility is required to adhere to, and the percentage of staff tested during the latest complete testing period
- The state is supporting surveillance testing costs for nursing facilities and rest homes

Testing Results (Through 11/19)	Total facilities required to submit testing data	427
	In Compliance (<i>Total facilities attesting to achieving testing threshold</i>)	217
	Not in Compliance (<i>Total facilities not achieving testing threshold</i>)	11
	Not in Compliance Incomplete Reporting (<i>Total facilities that did not submit complete testing data</i>)	31
	In progress (<i>Total facilities that are currently in week 1 of a biweekly testing period</i>)	168

Massachusetts Department of Public Health COVID-19 Dashboard

Infection Control Surveys

DPH serves as the State Survey Agency (SA) that submits COVID-19 nursing home data on behalf of Massachusetts to the Centers for Medicare & Medicaid Services (CMS). As outlined in the [June 1st CMS memorandum](#) CMS updated its COVID-19 reporting requirements to ensure 100% of Medicare- and Medicaid-certified nursing homes receive on-site review to mitigate the spread of COVID-19. Reporting requirements apply *only* to Medicare- and Medicaid-certified nursing homes, not *all* facilities in the state.

Multiple Surveys Explained: CMS requires states perform COVID-19 survey activities in addition to completing the required Focused Infection Control surveys of 100% of Medicare- and Medicaid-certified nursing homes by July 31, 2020. Additionally, CMS requires states perform on-site infection control surveys within three-to-five days of identification of any nursing home with three or more new COVID-19 suspected and confirmed cases since their last National Healthcare Safety Network (NHSN) COVID-19 report or any nursing home in which one confirmed resident case is present in a facility that was previously COVID-free. As facilities may require a number of on-site infection control surveys, we show here the results of the five most recent surveys.

Deficiencies Explained:

- The **severity** level reflects the impact of the deficiency and is categorized by four levels of harm.
- The **scope** level of a deficiency reflects how many residents were affected by the deficiency.
- For each deficiency, the DPH survey team determines the level of harm (**severity**) to the resident or resident(s) involved and then determines the **scope** of the problem within the nursing home.
- The team assigns an alphabetical Severity and Scope value to the deficiency. In the report below, the alphabetical values are A through L. Values closer to A signify lower scope and severity. Values closer to L (i.e. G or higher) signify higher scope and severity.
- The key at the bottom of each page indicates the level of deficiencies reported, which corresponds to dots of different colors:
Green = Deficiency-free survey; **Yellow** = D-level deficiency; **Pink** = E/F-level deficiency; **Red** = G or higher

372 facilities received a combined total of 1,097 Infection Control Surveys between June 1 and November 6.
Between November 2-6, 2020, 43 new surveys were mailed to facilities. Of those 43 new surveys:

New Surveys With 2+ Deficiencies	0 Facilities
New Surveys With 1 Deficiencies	13 Facilities
New Surveys With 0 Deficiencies	30 Facilities

CMS Infection Control Surveys Conducted at Nursing Homes

The Centers for Medicare and Medicaid Services (CMS) requires infection control surveys to be conducted at all Medicare- and Medicaid-certified nursing homes as defined in the following link: <https://www.cms.gov/files/document/qso-20-31-all.pdf>. DPH conducts these surveys on behalf of CMS.

Some facilities that meet certain CMS requirements have been surveyed more than once. Follow-up infection control surveys must be conducted within three-to-five days when: (1) one confirmed COVID-19 case is reported in a nursing home that previously did not have any COVID-19 cases, and (2) three or more new suspected and confirmed cases are reported in nursing homes in one week that had previously reported a case.

Reflects surveys processed between June 1, 2020 and November 6, 2020		KEY: Green = Deficiency-free survey; Yellow = D-level deficiency; Pink = E/F-level deficiency; Red = G or higher

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Traditions of Dedham	Norfolk County	96	0

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Massachusetts Department of Public Health COVID-19 Dashboard - COVID Cases in Assisted Living Residences (5/5)

Friday, November 27, 2020

Cumulative data collected as of 11/25/2020 8:00am

Facility	County	Maximum Capacity	Number of Confirmed Cases*
