Data are current as of 10:00 am on 7/15/2020; For populations <50,000, <5 cases are reported as such or suppressed for confidentiality purposes.

¹Previous reports documented the number of persons tested. This report represents to the total number of tests performed

²Percent change represents the difference in case counts (over the last 14 days) as of today (7/15/2020) as compared to the fourteen days preceding 7/8/2020.

³Address information for these cases are currently being obtained.

Bureau of Infectious Disease and Laboratory Sciences calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report published Oct 2016.)

Please note: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Notes

- (1) Massachusetts is divided into five geographical EMS regions. For more information, please see <https://www.mass.gov/service-details/ems-regions-in-massachusetts>.
- (2) Cases per 100,000 for each EMS region are calculated as the number of positive tests within a region divided by that region's population multiplied by 100,000.
- (3) Data source: MAVEN and Umass Donahue Institute Population Estimates.
- (4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. *Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Nursing Facilities Baseline Testing

- On, April 27th the Commonwealth announced a COVID-19 Nursing Facility Accountability and Support Program. Additional funding of up to \$130 m is being provided to improve the safety and infection control protocols for nursing home residents and staff.
- This additional funding is dependent upon facilities meeting specific accountability metrics, including **testing at least 90% of all nursing home residents and 90% of all staff for COVID-19 between April 8, 2020 and May 25, 2020**. Facilities were encouraged to test 100% of staff and residents.
- The Executive Office of Health and Human Services (EOHHS) worked closely with the Massachusetts Senior Care Association (MSCA) to ensure facilities had access to testing options in order to meet the May 25th deadline.
- This report depicts the percentage of staff and residents tested for COVID-19 at each facility and whether a facility met the 90% threshold. The data is self-attested by nursing facilities and may be subject to further audit and review by EOHHS for final determinations.
- Facilities that did meet the 90% testing threshold will not receive any additional funding under the Accountability and Support policy.**

Nursing Facilities Clinical Audits

- On, April 27th the Commonwealth announced a COVID-19 Nursing Facility Accountability and Support Program. The program is predicated on clinical audits every two weeks **based on a [28-point Infection Control Checklist](#)**.
- The 28 point infection control checklist was developed in accordance federal and state guidelines. Audits are completed by licensed nurses and clinical staff trained in infection control.
- The bi-weekly report depicts how each facility has scored on their audits.**
- Based on a facility's score on the 28-point checklist, each facility is rated:
 - 1) Green "In Adherence" and scored at least a 24 out of 28
 - 2) Yellow "In Adherence but warrants reinspection" and scored at least 20 out of 28
 - 3) Red "Not in Adherence" and scored under 20 and/or **missed at least one of six core competencies**
- All facilities have been audited *at least* twice
- While this is the fourth and final round of audits under the Accountability and Supports program, **Massachusetts will continue to regularly survey and audit nursing homes to ensure compliance with infection control and quality standards**

Audit Results (through 6/30)		Total audits completed	Round 1	Round 2	Round 3	Round 4
			360	230	243	172
	Total facilities in adherence	228	180	221	152	
	Total facilities in adherence but warrant reinspection	0	1	1	0	
	Total facilities not in adherence					
	- Facilities with score >20 but missed core competency	119	49	21	20	
	- Facilities with score <20	13	0	0	0	
	Percentage of facilities not in adherence	37%	14%	6%	6%	

* Round 4 audits were conducted at facilities that (1) are found to be "Not in Adherence" or "In Adherence but Warrants Reinspection" in Round 2 (2) have **historic infection control or quality issues**, and/or (3) are randomly selected for an audit

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence
